PROFESSIONAL SUMMARY

Azure Data Engineer with hands-on experience designing and delivering scalable **Lakehouse data platforms** using Python, PySpark, SQL & Modern Data Engineering. **Design then Develop - driven Data Engineer**, specializing in Azure, Apache Spark, big data processing, and Delta Lake. Experienced in building ETL/ELT data pipelines, migrating legacy infrastructure to cloud-native Azure platforms, implementing Medallion architectures with Delta Live Tables and building data quality, data observability and Automation frameworks. Actively Integrate or use AI tools to speed up development, improve efficiency, and modernize workflows while maintaining strong engineering fundamentals. **Seeking Data Engineer roles** focused on **Azure Databricks and Lakehouse platforms**.

TECHNICAL SKILLS

Cloud Platforms: Microsoft Azure, Databricks, Azure Data Lake Storage (ADLS), SAP Datasphere, Databricks Volumes

Programming: Python, PySpark, SQL, Spark SQL, PowerShell

Big Data and Streaming: Apache Spark, Delta Lake, Delta Live Tables (DLT), Structured Streaming, Batch Processing, Spark Optimization

Data Engineering: Lakehouse Design, Data Warehousing, Medallion Architecture (Bronze, Silver, Gold, Platinum), Data Modeling, Schema Enforcement, Incremental Processing

Data Quality: Data Quality Pipelines, Data Governance, Row-Level SQL Alerts, Data Observability, Data Validation, Reconciliation

ETL and Migration: ETL/ELT Pipeline Development, SSIS, SSRS, SSMS, JAMS, SAP ECC, Firestore, Elasticsearch, Legacy System Modernization

DevOps: Databricks Asset Bundles (DABs), CI/CD (Continuous Integration/Continuous Deployment), Git, Multi-Environment Deployment

Data Formats: JSON, Parquet, Delta, CSV, Semi-Structured Data, Unstructured Data Processing

Soft Skills: Problem-Solving, Data-Driven Decision Making, Cross-Functional Collaboration, Process Improvement, Attention to Detail, Effective Communication

WORK EXPERIENCE

zeb *Chennai, India*

Data Engineer | *Oct 2025 - Present*

Junior Data Engineer | *Feb 2025 - Sep 2025*

Data Engineering Intern | *Sep 2024 - Feb 2025*

PROJECTS

Chemical Manufacturing *(Enterprise Client) - Data Engineer*

- Built core components of an enterprise Azure Lakehouse platform, ingesting SAP ECC data via Datasphere into Databricks Volumes, delivering Gold and Platinum layers across 7 business domains: Manufacturing, Orders, Deliveries, Procurement, Finance, Maintenance, and Management.
- Deployed Delta Live Tables (DLT) pipelines processing 50,000+ daily order records for real-time tracking and predictive replenishment within the manufacturing supply chain.
- Configured row-level SQL alerts and observability layers, reducing data quality incidents by **83%** and improving reliability across production datasets.
- Automated production deployments using Databricks Asset Bundles (DABs) with CI/CD across 3 environments, cutting release time by **30%**.

Finance Sector *(Enterprise Client) - Junior Data Engineer*

- Migrated a finance ETL data infrastructure from 5 legacy tools (SSIS, SSRS, SSMS, JAMS, PowerShell) into a unified Azure Databricks environment within 5 months.
- Achieved **100% business metric accuracy with zero data loss** across 200+ tables throughout the full migration lifecycle.
- Built data validation and reconciliation pipelines, verifying integrity between source and target systems for every migrated dataset.
- Created reusable, parameterized notebook templates, reducing new pipeline development time by **33%** for the engineering team.

Insurance Agent Management - *Junior Data Engineer*

- Processed 10,000+ raw unstructured JSON documents daily from Firestore and Elasticsearch using PySpark on Azure, covering agent calls, campaigns, and medical records.
- Transformed unstructured backend data into structured analytics that identified top-performing agents, driving a **23% increase in subscription growth**.
- Developed 12+ scalable ingestion patterns for semi-structured sources with schema evolution handling, improving fault-tolerant processing reliability by **37%**.

General Rotational Training - *Data Engineering Intern*

- Completed a rotational data engineering training program, gaining hands-on exposure to Azure, Databricks, PySpark, and SQL through guided exercises and internal use cases.
- Built small-scale ETL pipelines and practiced data ingestion, transformation, and validation techniques under the guidance of senior engineers.
- Learned Lakehouse architecture fundamentals and Delta Lake concepts, building the foundation for full-time data engineering responsibilities.

EDUCATION

Bannari Amman Institute of Technology *Tamil Nadu, India*

Bachelor of Engineering, Electronics and Communication Engineering

Graduated 2025 | CGPA: 8.2 / 10

CERTIFICATIONS

Databricks Certified Data Engineer Professional

Databricks | Professional Level | Production-grade Delta Lake, DLT, Spark optimization, Lakehouse design, and performance tuning.

ADDITIONAL INFORMATION

- **Leadership:** Public speaking, technical community building, student club management, Radio & full-cycle event coordination.
- **Content:** Technical writings, Poetries, Social Influencing GenZ Contents.
